My first container vegetable garden

Starter plan. Complete what you know and identify what still needs checking. Not a calendar or harvest guarantee.

My growing space

Observation date and site (no private address)

Local season and source checked

How I will supply water

How I will remove excess water

Access route: what I checked

Support / stability: what remains to verify

Direct sunlight record

Record real observations. One day does not describe a whole growing season.

Position / date	Sun from / until	Shade / heat / unknowns

One record per container

Keep the variety and harvest goal. “Unassigned” is a valid choice.

ID	Crop / variety	Season / local source	Container / details to check

Sketch: door, access, pots, water and mature plant space

My first container vegetable garden

PDF: blank, non-interactive sheet. HTML: keep notes brief; longer entries may need more pages.

Before buying

Item	Have / need	Details to verify
Containers		
Growing mix / feed		
Seeds / young plants		
Manual watering		
Labels / support		

First-setup decisions

- ☐ I have identified crop and variety.
- ☐ I checked season and container suitability.
- ☐ I know the mix and included fertiliser.
- ☐ I can supply water and manage drainage.
- ☐ I set aside time for plant checks.

My first reviews

Date / pot	Observation	Action / next check
